

Box bodies Special superstructures for rescue vehicles

GMEINDER LOKOMOTIVEN manufacture special superstructures for trucks and Unimogs designed for most challenging and rough applications, e. g. rescue vehicles for fire fighting and civil protection.

We offer box bodies with or without crew cabin, bodies for transportation of rescue equipment as well as for maintenance and service vehicles.

GMEINDER LOKOMOTIVEN is your partner for special superstructures.

We manufacture superstructures for welding vehicles in road/rail operation, engine covers for machines and special vehicles in soundproof versions as well as toolboxes according to your requirements in very robust versions.
